

The Tools

HANDS - ON PROJECT

Project management tools help you manage your project effectively. Set milestones, track progress, and assign tasks to team members. Get real-time reports and alerts to stay on top of your project's progress.

The data are given for one of the branches of UK banks. The customers are mostly from different age group and are from different regions. The management wants to check the overall insight about customer data. The requested reports are defined as mentioned below.

1. Total Number of Unique customers across various regions and Gender distribution across each region
2. Gender distribution in percent among overall number of customers.
3. Average Balance based on Job Classification
4. Average balance based on age group.
5. Trend for the number of new customers on boarded each month of 2015
6. Find the two top most customers based on the sum of the balance they have in the account.
